

RESUME

MARK BENSON

Head of Samsung SmartThings

Email	mark@markbenson.io
Website	https://markbenson.io/
Twitter	https://twitter.com/markbenson
Medium	https://medium.com/@markbenson
LinkedIn	https://www.linkedin.com/in/markbenson/

SUMMARY

Accomplished C-level technology leader. Experienced in strategic, operational, and financial management of cross-functional teams in highly-competitive markets. Successful track record of defining and realizing pragmatic product strategies to meet the requirements of complex enterprises across multiple functions and verticals. Strong interpersonal and formal communication skills.

SPECIALTIES

SKILLS: Product Management | Software Engineering | Strategic Planning | Change Management | Competitive Strategy | Organizational Behavior

STRENGTHS / PERSONALITY: Learner, Restorative, Individualization, Achiever, Intellection / INFJ-A (Advocate)

METRICS

EDUCATION

Harvard Business School • Cambridge, MA (2011)

Leading Professional Service Firms

Areas of focus: microeconomics, leadership, organizational design, and customer relationship management.

University of Minnesota • Minneapolis, MN (2005 - 2007)

Master of Science, Software Engineering

Studied lock-free abstractions for reading and writing to shared resources in multi-threaded applications.

Bethel University • Arden Hills, MN (1997 - 2001)

Bachelor of Science, Computer Science

Studied computer science, minored in mathematics, and captained the tennis team.

RECENT BOOK

The Art of Software Thermal Management for Embedded Systems

An introduction to the art of controlling the thermodynamic behavior of computing systems with software. Published by Springer, New York (2014).

WORK EXPERIENCE SUMMARY

Head of SmartThings

Samsung SmartThings • Minneapolis, MN (October 2018 - Present)

SUMMARY: Responsible for SmartThings, a wholly owned subsidiary of Samsung

Chief Technology Officer

Exosite • Minneapolis, MN (September 2012 - October 2018)

SUMMARY: Responsible for software engineering, product management, competitive strategy, security, and quality.

Director of Software Strategy & Engineering

Logic Product Development • Minneapolis, MN (October 2000 - September 2012)

SUMMARY: Responsible for software strategy, embedded software engineering, and several product design programs.

MARK BENSON

WORK EXPERIENCE

	Head of SmartThings	<i>February 2022 - Present</i>
	<ul style="list-style-type: none"> • Define, champion, communicate, and live the SmartThings vision, mission, values in a way that clarifies, aligns, and inspires the organization to do their best work together. • Allocate capital and labor resources for company goals, priorities, and strategic initiatives; regularly evaluate business performance and operational metrics critical to success. • Establish, develop, and evaluate executive leadership for all key organizational functions. • Build and nurture a high performing and hyper-collaborative culture that is obsessed with delivering outcomes that matter to customers and partners. • Represent SmartThings to the public through industry relationships, events, media interviews, and thought leadership that establishes the organization's reputation and outlook. 	
	Head of Product & Engineering, SmartThings	<i>June 2021 - February 2022</i>
	<ul style="list-style-type: none"> • Responsible for business strategy, product vision, and product management for the SmartThings platform, edge technologies, partner tools, user experience, and design. • Responsible for hiring, growing, and retaining world-class talent that is inspired, empowered, and organized into small high-impact autonomous teams that are customer-obsessed and tightly aligned to achieving business outcomes. • Responsible for the financial performance of the SmartThings platform as well as expenses for direct labor, contractors, software costs, and management of external vendors. • Responsible for the organization's intellectual property portfolio, including patent prosecution, trademarks, and software license terms, and contracts. 	
	Head of Engineering, SmartThings	<i>February 2020 - June 2021</i>
	<ul style="list-style-type: none"> • Responsible for the strategic direction of the engineering organization including the definition and measurement of business outcomes, quarterly goals, annual objectives, and multi-year initiatives. • Responsible for creating and improving engineering processes for defining, designing, developing, delivering, and operating services and offerings with strong engineering hygiene while remaining flexible enough meet the needs of the business. • Responsible for the engineering budget including labor costs, optimization of direct/insource/outsource spending, infrastructure cost management, capacity planning, and software vendor contracts and partnerships. 	
	VP of Cloud Engineering, SmartThings	<i>October 2018 - February 2020</i>
	<ul style="list-style-type: none"> • Responsible for attracting, retaining, and growing top software engineering talent for cloud engineering teams including core IoT primitives, rules & behaviors, eventing, security management, release engineering, and developer enablement services. • Responsible for structuring, measuring, and improving all aspects of the software development process and related activities to improve agility, speed, performance, and quality in a way that aligns and empowers autonomous teams. • Responsible for the architecture and delivery of a globally-available and distributed platform that is reliable, scalable, secure, and performant while adhering to regional latency targets and privacy regulations. 	

MARK BENSON

WORK EXPERIENCE

Chief Technology Officer / Exosite

September 2012 - October 2018

- Responsible for 5-year technology roadmap for the company to ensure long-term stability and position in the emerging Industrial Internet of Things market.
- Responsible for technical talent for information technology, engineering, product management, technical communications, quality assurance, information security, and support services, including recruitment, hiring, career development, performance management, and retention for positions ranging from Vice Presidents to Directors to Managers to engineers and other administrative staff.
- Frequent speaker at community and professional events as an industry thought-leader and communicator to further the enterprise IoT industry, and grow Exosite brand strength in the marketplace.
- Responsible for the company's intellectual property portfolio, including patent prosecution, trademarks, and software license terms, and contracts.
- Responsible for competitive strategy and intelligence including win/loss analysis, competitive dimensions, competitive forces, competitive landscape predictions, and the strategy for developing symbiotic ecosystem partnerships.
- Responsible for corporate metrics and dashboards to give insight into business performance and to drive the leadership team to action-oriented, data-driven decisions and results.

Director of Software Strategy / Logic PD

February 2011 - September 2012

- Directed product software development activities and engineering talent, including recruitment, offers, reviews, training, career development, and mentoring to attract and retain top talent.
- Developed and communicated corporate software strategy by analyzing, identifying, and pursuing technologies and partnerships that enhance and defend Logic PD's long-term stability and brand position in the marketplace.
- Co-lead the Technology Roadmap Development program to identify and cultivate technologies that augment the company's IP portfolio through a structured process that solicits and empowers innovation throughout all levels of the company.
- Established Logic PD's Early Adopter Program (EAP) to provide key customers early access to Logic PD products hardware and software artifacts prior to general availability through distribution.

Director of Embedded Software Engineering / Logic PD

September 2009 - February 2011

- Directed service software development engineering talent, including recruitment, offers, reviews, training, career development, and mentoring to achieve \$2.2M annual revenue with a \$.9M gross margin contribution at 14% CAGR.
- Developed business by presenting product development products and services to potential clients via project plans, statements of work, terms and conditions, and face-to-face consultative selling techniques.
- Managed design service resource staffing issues by assigning personnel to product development projects using sales forecasts, yield projections, and resource modeling techniques.
- Introduced Monte Carlo methods, tools, and processes to the business development team for quantitatively assessing design service program risk to aid in the pricing process for fixed-bid programs.
- Acted as program manager for an ITAR-rated soldier vision system yielding \$1.8M in design services revenue with 30+ team members over 18 months.

MARK BENSON

WORK EXPERIENCE

Senior Software Engineer / Logic PD

May 2001 - September 2009

- Led a team of managers and executives to design, implement, and roll out an ISO13485-compliant Quality Management System and associated processes and tool for 125 employees under an aggressive schedule.
- Co-led a multi-discipline (ID, ME, EE, SE, MFG) team to design and develop a complex flash column chromatography fluidics and motion-control system based on an AMD Geode LX design running Windows XP and C# .NET for chemists.
- Led a geographically-distributed team to design and develop the software for a Linux and TI-OMAP-based next-generation portable video borescope.
- Led a team of principal engineers to evaluate a prostate mechanical imaging system for manufacturability with an eye towards improved next-generation versions of the product and associated cost-reduction opportunities.
- Led a team of principal engineers to architect a next-generation, low-power, cost-effective, web tablet based on a TI OMAP 35x ARM/DSP running Windows CE 6.0 for the medical industry.
- Led a multi-discipline (ID, ME, EE, SE) team of engineers to develop an Engine Trend Monitoring device for Turbo-Prop Commuter Planes and Homebuilt aircraft.
- Developed an MFC application over the course of 9 months to control a heart lung machine (HLM) bio-pump using an XScale PXA255 Windows CE 4.20 hardware platform.
- Wrote Logic PD's Software Development Process and created all associated templates and forms for use across the organization and its 150+ annual development projects.
- Wrote a U-Boot extension for managing a BoP (Broadband over Powerline) chipset for a traffic management system.
- Developed an inventory scanner system for bicycle shops using Windows CE, C++, and a PXA270-based Symbol scanner.
- Managed a distributed team of engineers to develop the Linux-based embedded platform for a handheld wireless voice-controlled music and information system.
- Developed a user-mode Linux application in C to read and write an Analog Devices 5245 digital potentiometer using I2C.
- Developed a Linux Board Support Package (BSP) using C, gcc, binutils, and glibc for a brain-state assessment device for infants using auditory screening based on a TI OMAP 5910.
- Developed a Windows CE DLL to communicate over Microsoft ActiveSync RAPI to an automobile engine-analysis scope.
- Led a team of as many as 7 engineers over 16 months to port pacemaker and defibrillator software applications written in C for the QNX RTOS to a next-generation platform.
- Developed a mapping application using Microsoft .NET, C#, C++, and GDI+ to manage an array of infrared laser radar devices and night-vision cameras.
- Developed an application to streamline drug testing and associated chain-of-custody forms using Microsoft .NET, COM+, and Microsoft SQL Server.
- Developed and executed automated and manual tests using an oscilloscope and signal generator to verify a safety-critical fiber-optic safety sensor.
- Developed an application with a dynamic GUI that could be described in XML using MFC and C++ to program a family of industrial safety sensors.
- Wrote a language and accompanying interpreter along with two (2) other Software Engineers to control a printer laminator/cutter/stapler/stacker device using C and an Hitachi H8S.

RECOGNITIONS

Titans of Technology - Mark Benson

February 2017

The Minneapolis / St. Paul Business Journal connects the business community with breaking news and features. The Titans of Technology award recognizes individuals who are transforming Minnesota's tech industry and giving companies a competitive edge. In spring of 2017, the Minneapolis / St. Paul Business Journal awarded Mark Benson honors as a top CTO in the region.

Forbes Technology Council

August 2016 - October 2018

Forbes is one of the most iconic media companies in the world. The Forbes Technology Council is an invitation-only community for world-class CIOs, CTOs and technology executives. Members are selected based on their technology expertise, leadership in a high-growth business, track record of industry recognition, and community impact. Mark Benson was invited to the Forbes Technology Council in 2016 and is a regular contributor on Forbes.com.

Hewlit Packard Enterprises: Executive Corner Featuring Mark Benson

Octrober 2015

Through its recurring online publication, HP Matter provides in-depth insight and expertise on a variety of trending topics and quickly evolving industries. Each issue features Executive Corner interviews with thought leaders in fields relevant to the issue's topic. Their October, 2015 issue (The Energy Issue: Exploring the Resources that Power Economies) featured Mark Benson and examined the convergence of energy and technology, as well as the shift of the energy landscape towards connectivity in an effort to enable greater efficiencies, reduce consumption, and improve consumer experiences.

TECHdotMN Meet a Minnesota CTO: Mark Benson

May 2015

TECHdotMN cultivates and reports on Minnesota's high tech ecosystem and the early stage ventures within it through a mix of unique audio/ video features and written word. TECHdotMN's Meet a Minnesota CTO series gets up close and personal with Minnesota's chief technologists. In May of 2015, TECHdotMN featured Mark Benson.
